### **DETAILED ACTION**

## Election/Restrictions

- 1. Applicant's election without traverse of the invention of Group I in Paper No. 5 is acknowledged.
- Claims 7-11 are withdrawn from further consideration pursuant to 37 CFR
   1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made without traverse in Paper No. 5.

# Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 329,938. '938 discloses a brush (1) comprising an elongate block (5), a spigot (any portion of member 2 which is integral with and extending from the block) which extends laterally from the block, handle (the remainder of the member 2 or member 3) secured to the spigot and a plurality of bristles (7) extending from the block with some (11 in the embodiment of fig 2) of the bristles on a region of the block adjacent the spigot extending generally in the direction of the spigot towards the handle.
- 5. Claims 1 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Featherstone (USP 879,754). The patent to Featherstone discloses a brush comprising an elongated block (4), spigot (2) laterally extending from the block, handle (1) secured

to the spigot and bristles (3) extending from the block with some of the bristles being adjacent (which is near or close to) the spigot and generally extending in the direction of the spigot and towards the handle.

6. Claims 1,2,4 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by McParland (USP 5,878,459). The patent to McParland discloses a brush (10) comprising an elongated block (30), spigot (34 in fig 2 or in "integral" version in fig 3) laterally extending from the block, handle (12) secured to the spigot and a plurality of bristles (26) extending from the block with at least some of them adjacent the spigot extending generally in the direction of the spigot and handle. Fig 2 should the spigot fitting into a recess in the handle (claim 5).

## Claim Rejections - 35 USC § 103

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over McParland (USP 5,878,459) in view of FR 472,405. The patent to McParland discloses the invention substantially as claimed with the exception of the pin. '405 discloses a pin (f) for coupling a brush handle (b) to a "spigot" (e) extending from a brush head (a). It would have been obvious to one of ordinary skill to have modified the device of McParland to include such a pin to better retain the spigot within the handle.
